A. Original Evidence

Meridian Group
STRATEGY & OPERATIONS DIVISION

REPORT NO: MG-2026-041
DATE: April 11, 2026
CLASSIFICATION: Internal

Q1 2026 Performance Review
QUARTERLY OPERATIONS & FINANCIAL SUMMARY

EXECUTIVE SUMMARY

The first quarter of 2026 demonstrated sustained momentum across all operational verticals. Revenue targets were met with a marginal 3.2% surplus, while operational costs remained within the projected band. The organization continued its strategic realignment toward higher-margin service offerings, resulting in improved EBITDA performance relative to the prior period.

$4.8M	18.4%	94.1%	+12%
TOTAL REVENUE	EBITDA MARGIN	CLIENT RETENTION	YOY GROWTH

OPERATIONAL HIGHLIGHTS

The logistics and supply chain units recorded an on-time delivery rate of 97.3%, a 2.1-point improvement over Q4 2025. The technology infrastructure migration was completed ahead of schedule, reducing downtime incidents by 40%. Client onboarding time was reduced from an average of 18 days to 11 days through process automation initiatives implemented in February.

OUTLOOK & RECOMMENDATIONS

Management recommends continued investment in the enterprise client segment, which now represents 61% of total revenue. Pipeline indicators for Q2 2026 suggest a potential 8–11% sequential revenue increase. Risk mitigation measures related to supply chain diversification should be finalized before the end of May to safeguard against projected market volatility in the Asia-Pacific region.
